

Technical Data

Management Computers > Backwash

> Filter Wash Programmer

DESCRIPTION:

Application

- Filtering automatic batteries management

Specifics

- Cleaning cycle control by pressure differential switch and/or by time
- Filter washing time management and pause between filters
- Unit power supply: green panel box: 12V DC battery - Yellow panel box: 220V 50Hz

Hardware Features

- Outputs: 2 ÷ 4 outputs
- Outputs voltage: (12V Latch/24VAC)
- Output for master valve control
- Inputs: differential pressure switch
- External box

Materials

- Box: PVC/ABS

Automation

Code	Outputs nr	Power supply	
		in	out
AAC571	2	220 V	24 V
AAC573	3	220 V	24 V
AAC572	4	220 V	24 V
AAC550	2	12 V DC	12 V Latch
AAC552	3	12 V DC	12 V Latch
AAC551	4	12 V DC	12 V Latch

ACCESSORIES

Code	Description	Power supply	
		in	out
AAC1055	Mains supply	230 V AC	12 V DC
1,5 V batteries not included
