### > Practicable Grating for Decking

#### DESCRIPTION:

- Measurements: 580 x 580 x 40 mm
- Load capacity: 187 tons / sqm certified
- Two opposing faces of different shapes allow the use of the grating on different surfaces
- High speed of installation (about 120 m<sup>2</sup> / hour can be installed or removed)
- It has no editing direction
- The elements can be mounted squarely, staggered, one on top of the other staggered and not and finally one from the upper side and the other from the lower side slightly staggered both horizontally and vertically
- Even a single grating can be removed and repositioned at any time thanks to the special coupling system
- Resistant and flexible thanks to the particular shape of the vertical ribs and hooks
- The water reserve (1,5 l / m<sup>2</sup>) distributed throughout the surface of the element can be doubled by creating

#### Features

- a double layer of grating, thus also increasing the layer of soil up to 6 cm
- Thanks to the wide slots specially positioned in the grating, with dimensions up to 27 x 15 mm with a longitudinal transverse light with aerobic function, the roots spread better horizontally and around the grating; in this way the growth of the lawn is guaranteed in a homogeneous way. In addition, the water is distributed gradually without stagnating, ensuring a very high draining capacity
- Non-slip on both sides thanks to the rounded spikes that do not affect the possibility of creating walkways in general
- Complete with valid accessories such as signage caps and locking rings that allow you to make a single and stable body, several pieces joined together, in order to obtain exceptional stability and flexibility

Landscape

Code	Description	Colour	Dimens. m <sup>2</sup>	Box	
GCR001	Grating	Green*	1	3
